

Demolition of House

In order to prepare a portion of Trinity's property to sell, the house on the east side of Trinity's parking lot will be demolished sometime after November 2nd.

There should be no impact on the safety or welfare of children and/or the operation of the school.

The city requires that all dust be mitigated by having a water truck that constantly sprays the material so that it is not airborne. In addition, all activities will be within the fenced areas so children will not have access to the demolition area. There may be some noise issues for short periods of time but the distance from the house to the school will mitigate that issue and since windows will be closed with the current weather, that will further mitigate against noise problems.
